

JANAKA PREMATHILAKA

Senior Java Developer

Address:	Zug 6300, Switzerland	Date of Birth:	15.02.1980
Phone:	+41 76 224 84 45	Nationality:	Belgian (Swiss C Permit)
Email:	janaka2@gmail.com	Availability:	2 Months Notice
LinkedIn:	in/janakapremathilaka	On-Call(Pikett):	Yes

PROFESSIONAL PROFILE

Senior Full Stack Java Developer with 22+ years of experience engineering high-volume, low-latency distributed applications for mission-critical banking systems. Highly proficient in **Java 11-17**, Spring Boot, and cloud-native microservices architectures. Recently spearheaded data-driven automation using LLMs and Agentic RAG, perfectly aligning with the development of next-generation recommendation engines. Strong advocate for DevOps culture, TDD, code quality, and active mentoring in Agile/SAFe environments. Fully willing to participate in application support and on-call duties (Pikettdienst).

PROFESSIONAL EXPERIENCE

01.2024 – Present Zurich, Switzerland	Senior Full-Stack Java Developer (Lead) UBS / Cognizant • Took full ownership of 6 complex enterprise applications during the Credit Suisse to UBS merger, ensuring system stability and zero operational interruptions. • Spearheaded a high-pressure application archiving initiative, taking 100% ownership of on-time delivery. Engineered robust Linux scripts to interface with Oracle DBs via CLI, successfully extracting and formatting multi-gigabyte datasets with attachments for target feeds, resulting in exceptional client satisfaction and formal commendations. • Implemented robust, data-driven solutions utilizing RPA with LLMs and Agentic RAG, driving intelligent automation and insights. • Acted as a technical driver for standardization, actively mentoring junior developers and instilling a strong engineering culture and code quality pride. • Managed mission-critical production incidents, demonstrating strong capacity for application support and observability.
--	---

05.2019 – 01.2024

Zurich, Switzerland

IT Solution Developer

Credit Suisse / Cognizant

- Took 100% ownership of the end-to-end design, development, and deployment of a mission-critical **Master Data Management (MDM)** tool. Functioned as the golden data source, efficiently preparing and feeding data to big data endpoints for advanced searching and reporting.
- Independently established the complete CI/CD deployment pipeline for the MDM and rapidly adopted **Angular** to deliver the UI, demonstrating a strong self-starter mindset and earning widespread client appreciation.
- Spearheaded the greenfield development of a Client Lifecycle Management and Event Management suite. Architected and delivered three robust, scalable applications within a **cloud-native environment**, leveraging a **microservices architecture** with Spring Boot, React, and Oracle.
- Engineered a scalable, low-latency **Front-Office FX trading platform** using **Java 11-17**, optimizing trade executions and boosting system responsiveness by 20%.
- Applied deep knowledge of **multi-threading and memory management** to ensure robust performance under high-volume transaction loads.
- Fostered a DevOps culture by building and maintaining deployment pipelines using Kubernetes, Docker, Splunk, and **Grafana**.
- Championed Test-Driven Development (TDD) utilizing **JUnit and Mockito**, actively participating in collaborative code reviews and pair programming in a Scrum setup.

01.2018 – 05.2019

Zurich, Switzerland

IT Solution Development Specialist

UBS / Cognizant

- Modernized over 20 legacy components to Spring Boot microservices, factoring non-functional requirements into robust solution architectures.
- Automated delivery pipelines using **Jenkins** for static code analysis, deployments, and custom reporting.
- Enhanced testing capabilities utilizing Cucumber BDD, ensuring high functional and technical quality before deployment.

06.2011 – 01.2018

Brussels, Belgium

Senior Full-Stack Java Developer

European Commission (DIGIT Division)

- Engineered and maintained the core e-procurement system, a mission-critical European public sector application, delivering high-quality front-end and back-end solutions over a 6.5-year tenure.
- Developed scalable microservices and integrated distributed systems utilizing Spring Integration for message routing, transformation, and synchronization.
- Streamlined complex business logic by implementing robust JBPM workflows.
- Ensured rigorous code quality through extensive unit and integration testing (JUnit, Mockito), managing continuous software releases via Jenkins.

05.2004 – 06.2011
Belgium & Sri Lanka

Senior Java/JEE Consultant & Engineer

Johnson & Johnson, Nokia Siemens, Union Bank of Colombo

- Acted as a core technical consultant across Healthcare, Telecommunications, and Banking sectors, designing and implementing enterprise-grade Java/JEE solutions.
- Collaborated within Agile/Scrum environments to modernize architectures, integrating complex SOAP/REST web services and optimizing Oracle/MySQL database interactions.

EDUCATION & CERTIFICATIONS

1999 – 2003
Sri Lanka

BSc in Computer Science, Statistics, Mathematics

University of Sri Jayewardenepura

Certifications: Spring Certified Professional (In Progress), Sun Java Certifications (SCJP, SCBCD, SCEA1, SCWCD), AI & ChatGPT Completions (2023)

TECHNICAL SKILLS

Languages: Java (11-17), SQL, TypeScript, Python

Architecture: Microservices, Multi-threading, GraphQL, REST

Frameworks: Spring Boot, Hibernate, React, Angular

DevOps & Cloud: Kubernetes, Jenkins, Grafana, Docker

Testing & Agile: TDD, JUnit, Mockito, Jira, Scrum/SAFe

LANGUAGES

English	Full Professional (C1/C2)
German	Intermediate (B1)
French & Dutch	Basic Knowledge
Sinhalese	Native

Excellent references from UBS, Credit Suisse, and European Commission available upon request.
