

JANAKA PREMATHILAKA

Senior Java Engineer & Solution Architect

Banking Systems · AI Integration

Address:	Zug 6300, Switzerland	Date of Birth:	15.02.1980
Phone:	+41 76 224 84 45	Nationality:	Belgian (Swiss C Permit)
Email:	janaka2@gmail.com	Availability:	2 months' notice
LinkedIn:	in/janakapremathilaka	On-Call (Pikett):	Yes
GitHub:	github.com/Janaka2	Blog:	javawithme.wordpress.com

PROFESSIONAL PROFILE

Senior Full-Stack Java Engineer and tech lead with 22+ years building mission-critical, regulated banking systems for UBS, Credit Suisse, the European Commission and Union Bank of Colombo. Owned 6 enterprise applications through the Credit Suisse–UBS merger and delivered audited archiving on time. Since 2023, bringing LLM, RAG and agentic automation into regulated environments — including local model inference where data cannot leave the bank. Strong advocate of TDD, observability and mentoring in Agile/SAFe environments. Fully available for application support and on-call duties (Pikettdienst).

PROFESSIONAL EXPERIENCE

01.2024 – Present Senior Full-Stack Solution Engineer (Lead)

Zurich, Switzerland UBS / Cognizant

- Took full ownership of 6 complex enterprise applications during the Credit Suisse–UBS merger, ensuring system stability and zero operational interruptions.
- Led a high-pressure application archiving initiative with 100% on-time delivery under audit-grade deadlines; engineered Linux + Oracle CLI extraction pipelines for multi-gigabyte regulated data feeds.
- Designed and shipped LLM and agentic-RAG automations for internal banking workflows, integrated with existing Java services; ran local Llama 3 inference for data that cannot leave the bank's perimeter.
- Technical driver for standardization: mentoring junior engineers, leading code reviews, and holding the line on testing, observability and reliability.
- Managed mission-critical production incidents; full on-call (Pikett) participation.

Stack: Java 17, Spring Boot, Kafka, Oracle, OpenShift/Kubernetes, Splunk, Grafana, Jenkins, n8n, LangChain, LlamaIndex, RAG/CAG, local + API LLMs

05.2019 – 01.2024 IT Solution Developer

Zurich, Switzerland Credit Suisse / Cognizant

- Took 100% ownership of the end-to-end design, development and deployment of a mission-critical Master Data Management (MDM) tool — the golden data source feeding big-data endpoints for advanced search and reporting.
- Spearheaded the greenfield Client Lifecycle Management and Event Management suite; architected and delivered three robust, scalable cloud-native applications (Spring Boot, React, Oracle, microservices).
- Engineered a scalable, low-latency Front-Office FX trading platform (Java 11–17), boosting system responsiveness by ~20% through multithreading and memory tuning.
- Independently established the complete CI/CD deployment pipeline for the MDM and rapidly adopted Angular to deliver the UI.

- Fostered DevOps culture (Kubernetes, Docker, Splunk, Grafana); championed TDD with JUnit and Mockito in a Scrum setup.

Stack: Java 11–17, Spring Boot, Spring Data, React, GraphQL, Kafka, Liquibase, Oracle/PL-SQL, OpenShift, Kubernetes, Helm, Jenkins, Splunk, Grafana

01.2018 – 05.2019

Zurich, Switzerland

IT Solution Development Specialist

UBS / Cognizant

- Modernized 20+ legacy components into Spring Boot microservices, factoring non-functional requirements into robust solution architectures.
- Automated delivery pipelines with Jenkins (static analysis, deployments, custom reporting); migrated the codebase from SVN to Git.
- Strengthened testing with JUnit, integration tests and Cucumber BDD, ensuring high functional and technical quality before deployment.

06.2011 – 01.2018

Brussels, Belgium

Senior Full-Stack Java Developer

European Commission (DIGIT Division)

- Engineered and maintained the EU's core e-procurement system — mission-critical, multi-language, public-sector — over a 6.5-year tenure.
- Built distributed integration flows with Spring Integration and implemented JBPM workflows for complex approvals, escalations and audit trails.
- Delivered front-end and back-end across the stack (Angular, Spring/Hibernate, EJB3, Oracle, WebLogic); owned releases and provided L3 production support.

05.2004 – 06.2011

Belgium & Sri Lanka

Senior Java/JEE Consultant & Engineer

Johnson & Johnson, Nokia Siemens, Union Bank of Colombo, and others

- Core technical consultant across healthcare, telecom, banking and e-commerce, designing and implementing enterprise-grade Java/JEE solutions.
- Union Bank of Colombo: built core banking modules — loan system, lease schedule generator, cheque and passbook printing (EJB2, JSP, DB2 on AS/400).
- Modernized architectures in Agile/Scrum settings, integrating SOAP/REST web services and optimizing Oracle/MySQL database interactions.

EDUCATION & CERTIFICATIONS

1999 – 2003

Sri Lanka

BSc in Computer Science, Statistics & Mathematics

University of Sri Jayewardenepura

- Sun Certified Enterprise Architect (SCEA); also SCJP, SCBCD and SCWCD.
- Spring Certified Professional — in progress (2026).

TECHNICAL SKILLS & LANGUAGES

Languages: Java (11–17), SQL, TypeScript, Python

AI / LLM engineering: LangChain, LlamaIndex, RAG/CAG patterns, agentic workflows (n8n), local LLM inference (Llama 3), prompt & parameter tuning

Architecture: Microservices, solution architecture, event-driven (Kafka), multithreading, GraphQL, REST

Frameworks: Spring Boot, Hibernate, React, Angular

DevOps & Cloud: Kubernetes/OpenShift, Docker, Jenkins, Grafana, Splunk

Testing & Agile: TDD, JUnit, Mockito, Cucumber, Jira, Scrum/SAFe

English — Full Professional (C1/C2)

German — Intermediate (B1), improving

French & Dutch — Basic knowledge

Sinhalese — Native

Excellent references from UBS, Credit Suisse, and the European Commission available upon request.
